Abstract

1 Place abstract here after paper is written.

2 1 Introduction

3 NIPS requires electronic submissions. The electronic submission site is

4 <https://cmt.research.microsoft.com/NIPS2017/>

5 Please read carefully the instructions below and follow them faithfully.

6 1.1 Style

7 Papers to be submitted to NIPS 2017 must be prepared according to the instructions presented here.
8 Papers may only be up to eight pages long, including figures. This does not include acknowledgments
9 and cited references which are allowed on subsequent pages. Papers that exceed these limits will not
10 be reviewed, or in any other way considered for presentation at the conference.

11 The margins in 2017 are the same as since 2007, which allow for ~15% more words in the paper
12 compared to earlier years.

13 Authors are required to use the NIPS L^AT_EX style files obtainable at the NIPS website as indicated
14 below. Please make sure you use the current files and not previous versions. Tweaking the style files
15 may be grounds for rejection.

16 1.2 Retrieval of style files

17 The style files for NIPS and other conference information are available on the World Wide Web at

18 <http://www.nips.cc/>

19 The file `nips_2017.pdf` contains these instructions and illustrates the various formatting require-
20 ments your NIPS paper must satisfy.

21 The only supported style file for NIPS 2017 is `nips_2017.sty`, rewritten for L^AT_EX 2_ε. **Previous**
22 **style files for L^AT_EX 2.09, Microsoft Word, and RTF are no longer supported!**

23 The new L^AT_EX style file contains two optional arguments: `final`, which creates a camera-ready copy,
24 and `nonatbib`, which will not load the `natbib` package for you in case of package clash.

25 At submission time, please omit the `final` option. This will anonymize your submission and add
26 line numbers to aid review. Please do *not* refer to these line numbers in your paper as they will be
27 removed during generation of camera-ready copies.

28 The file `nips_2017.tex` may be used as a “shell” for writing your paper. All you have to do is
29 replace the author, title, abstract, and text of the paper with your own.

30 The formatting instructions contained in these style files are summarized in Sections 2, 3, and 4
31 below.

32 **2 General formatting instructions**

33 The text must be confined within a rectangle 5.5 inches (33 picas) wide and 9 inches (54 picas) long.
34 The left margin is 1.5 inch (9 picas). Use 10 point type with a vertical spacing (leading) of 11 points.
35 Times New Roman is the preferred typeface throughout, and will be selected for you by default.
36 Paragraphs are separated by $\frac{1}{2}$ line space (5.5 points), with no indentation.

37 The paper title should be 17 point, initial caps/lower case, bold, centered between two horizontal
38 rules. The top rule should be 4 points thick and the bottom rule should be 1 point thick. Allow $\frac{1}{4}$ inch
39 space above and below the title to rules. All pages should start at 1 inch (6 picas) from the top of the
40 page.

41 For the final version, authors’ names are set in boldface, and each name is centered above the
42 corresponding address. The lead author’s name is to be listed first (left-most), and the co-authors’
43 names (if different address) are set to follow. If there is only one co-author, list both author and
44 co-author side by side.

45 Please pay special attention to the instructions in Section 4 regarding figures, tables, acknowledgments,
46 and references.

47 **3 Headings: first level**

48 All headings should be lower case (except for first word and proper nouns), flush left, and bold.

49 First-level headings should be in 12-point type.

50 **3.1 Headings: second level**

51 Second-level headings should be in 10-point type.

52 **3.1.1 Headings: third level**

53 Third-level headings should be in 10-point type.

54 **Paragraphs** There is also a `\paragraph` command available, which sets the heading in bold, flush
55 left, and inline with the text, with the heading followed by 1 em of space.

56 **4 Citations, figures, tables, references**

57 These instructions apply to everyone.

58 **4.1 Citations within the text**

59 The `natbib` package will be loaded for you by default. Citations may be author/year or numeric, as
60 long as you maintain internal consistency. As to the format of the references themselves, any style is
61 acceptable as long as it is used consistently.

62 The documentation for `natbib` may be found at

63 <http://mirrors.ctan.org/macros/latex/contrib/natbib/natnotes.pdf>

64 Of note is the command `\citet`, which produces citations appropriate for use in inline text. For
65 example,

66 `\citet{hasselmo}` investigated\dotso

67 produces

68 Hasselmo, et al. (1995) investigated...

69 If you wish to load the `natbib` package with options, you may add the following before loading the
70 `nips_2017` package:

71 `\PassOptionsToPackage{options}{natbib}`

72 If `natbib` clashes with another package you load, you can add the optional argument `nonatbib`
73 when loading the style file:

74 `\usepackage[nonatbib]{nips_2017}`

75 As submission is double blind, refer to your own published work in the third person. That is, use “In
76 the previous work of Jones et al. [4],” not “In our previous work [4].” If you cite your other papers
77 that are not widely available (e.g., a journal paper under review), use anonymous author names in the
78 citation, e.g., an author of the form “A. Anonymous.”

79 4.2 Footnotes

80 Footnotes should be used sparingly. If you do require a footnote, indicate footnotes with a number¹
81 in the text. Place the footnotes at the bottom of the page on which they appear. Precede the footnote
82 with a horizontal rule of 2 inches (12 picas).

83 Note that footnotes are properly typeset *after* punctuation marks.²

84 4.3 Figures

85 All artwork must be neat, clean, and legible. Lines should be dark enough for purposes of reproduction.
86 The figure number and caption always appear after the figure. Place one line space before the figure
87 caption and one line space after the figure. The figure caption should be lower case (except for first
88 word and proper nouns); figures are numbered consecutively.

89 You may use color figures. However, it is best for the figure captions and the paper body to be legible
if the paper is printed in either black/white or in color.

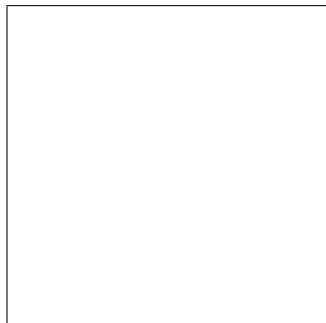

Figure 1: Sample figure caption.

90

¹Sample of the first footnote.

²As in this example.

Table 1: Sample table title

Part		
Name	Description	Size (μm)
Dendrite	Input terminal	~ 100
Axon	Output terminal	~ 10
Soma	Cell body	up to 10^6

91 4.4 Tables

92 All tables must be centered, neat, clean and legible. The table number and title always appear before
93 the table. See Table 1.

94 Place one line space before the table title, one line space after the table title, and one line space after
95 the table. The table title must be lower case (except for first word and proper nouns); tables are
96 numbered consecutively.

97 Note that publication-quality tables *do not contain vertical rules*. We strongly suggest the use of the
98 booktabs package, which allows for typesetting high-quality, professional tables:

99 <https://www.ctan.org/pkg/booktabs>

100 This package was used to typeset Table 1.

101 5 Final instructions

102 Do not change any aspects of the formatting parameters in the style files. In particular, do not modify
103 the width or length of the rectangle the text should fit into, and do not change font sizes (except
104 perhaps in the **References** section; see below). Please note that pages should be numbered.

105 6 Preparing PDF files

106 Please prepare submission files with paper size “US Letter,” and not, for example, “A4.”

107 Fonts were the main cause of problems in the past years. Your PDF file must only contain Type 1 or
108 Embedded TrueType fonts. Here are a few instructions to achieve this.

- 109 • You should directly generate PDF files using `pdflatex`.
- 110 • You can check which fonts a PDF files uses. In Acrobat Reader, select the menu
111 Files>Document Properties>Fonts and select Show All Fonts. You can also use the program
112 `pdf fonts` which comes with `xpdf` and is available out-of-the-box on most Linux machines.
- 113 • The IEEE has recommendations for generating PDF files whose fonts are also ac-
114 ceptable for NIPS. Please see [http://www.emfield.org/icuwb2010/downloads/](http://www.emfield.org/icuwb2010/downloads/IEEE-PDF-SpecV32.pdf)
115 `IEEE-PDF-SpecV32.pdf`
- 116 • `xfig` “patterned” shapes are implemented with bitmap fonts. Use “solid” shapes instead.
- 117 • The `\bbold` package almost always uses bitmap fonts. You should use the equivalent AMS
118 Fonts:

119 `\usepackage{amsfonts}`

120 followed by, e.g., `\mathbb{R}`, `\mathbb{N}`, or `\mathbb{C}` for \mathbb{R} , \mathbb{N} or \mathbb{C} . You can also
121 use the following workaround for reals, natural and complex:

```
122 \newcommand{\RR}{\mathbb{R}} %real numbers
123 \newcommand{\Nat}{\mathbb{N}} %natural numbers
124 \newcommand{\CC}{\mathbb{C}} %complex numbers
```

125 Note that `amsfonts` is automatically loaded by the `amssymb` package.

126 If your file contains type 3 fonts or non embedded TrueType fonts, we will ask you to fix it.

127 6.1 Margins in L^AT_EX

128 Most of the margin problems come from figures positioned by hand using `\special` or other
129 commands. We suggest using the command `\includegraphics` from the `graphicx` package.
130 Always specify the figure width as a multiple of the line width as in the example below:

```
131 \usepackage[pdftex]{graphicx} ...  
132 \includegraphics[width=0.8\linewidth]{myfile.pdf}
```

133 See Section 4.4 in the graphics bundle documentation ([http://mirrors.ctan.org/macros/](http://mirrors.ctan.org/macros/latex/required/graphics/grfguide.pdf)
134 [latex/required/graphics/grfguide.pdf](http://mirrors.ctan.org/macros/latex/required/graphics/grfguide.pdf))

135 A number of width problems arise when L^AT_EX cannot properly hyphenate a line. Please give LaTeX
136 hyphenation hints using the `\-` command when necessary.

137 Acknowledgments

138 Omitted until final paper

139 References

140 References follow the acknowledgments. Use unnumbered first-level heading for the references. Any
141 choice of citation style is acceptable as long as you are consistent. It is permissible to reduce the font
142 size to `small` (9 point) when listing the references. **Remember that you can go over 8 pages as**
143 **long as the subsequent ones contain *only* cited references.**
